From
Sri. H. Narasimha,
Project Executive Officer,
South Kanara, MANGALORE.

The Director of Community Development, MADRAS.

Sir,

COMMUNITY PROJECTS--South Kanara--Irrigation--Putting up of explanatory tube wells--Resolution of Project Advisory Committee--Recommended.
Ref: Govt. Memo-No. Order No. Ms.1840 Dated 30-9-1954 ... A

In the Government Order cited above, the Industries Department was requested to put up a few explanatory tube wells for irrigation purposes at suitable places in this Community Project Area. At its meeting held on 28-10-1954, the Project Advisory Committee has recommended that such wells may be sunk at (1) Belvai of Coondapur Taluk (2) Moodabidri of Karkal Taluk (3) Hosmar and (4) in any other suitable place in the coastal area. The Supervisor of Industries, Mangalore had investigated this matter and submitted his proposals to the Director of Industries and Commerce, Madras.

I request that steps may be taken to have the tube wells put up at places mentioned above if they are not already covered by the proposals submitted by the Industries Department.

Yours faithfully,

Project Executive Officer. 6/11

Memo No. 1186 Pub.(RDP)-V/54-1 d/- 22-2-55

Sub:- C.Ps - S.Kanara - Irrigation - Putting up of exploratory tube wells - Resolution of of the Project Advisory Committee - Orders issued.

Ref:- From the P.E.O., Mangalore Ref.5156/54-B dated 6-11-1954.
From the D.I. & C. No.98805-B.7/54 dated 5-12-1954.

In his reference cited the P.E.O., Mangalore has submitted proposals for putting up tube wells in S.Kanara Project area. The proposals were examined in consultation with the D.I. & C.

2. The question of sinking tube wells throughout the State was already considered by the Govt. It was held that tube wells could be worked economically only in Chingleput andTanjore districts where each tube well can be expected to irrigate an extent of about 40 acres and the scheme had to be given up in other districts as the irrigable extents available in those districts ~~roughed~~ ranged between 8 - 20 acres only for each tube well. As regards South Kanara Project area the D.I. & C. stated that trial borings might be tried and suggested 4 places said to have been selected in 1950 for putting down trial borings. It was considered that it would not be worthwhile spending Govt. money on purely exploratory drilling operations and finally decided that such works might well be left to private enterprise. It is not also ~~Nor it is~~ impossible to undertake such works with the C.P.Funds available under 'Irrigation' as they are loanable items only.

The P.E.O. is requested to explain the position to the members of the Project Advisory Committee.

9/2/55

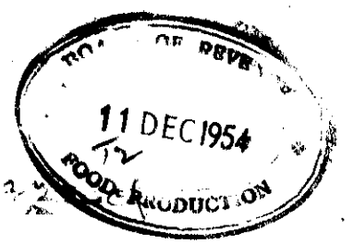
Extract from the file bearing C.No. 1180/54.

(From the Agri.(FP) U.O.Note No.26651/FP.VI-A/54-2 dated 19-11-1954.)



Please see the U.O.Note on pp. 35-37 c.f. from the Agri.(FP) Deptt. with reference to the U.O.Note on pp. 23-24 c.f.

Sri K.P.Mukunda Prabhu, Member of the S.Kanara Project Executive Committee in his letter addressed to the Administrator, C.P.A. among ether things stated the no scheme has been taken up in S.Kanara district as yet, to see thether tube wells are technically a feasible proposition, and that the scheme should be tried in the higher ranges such as Mudabidri etc., places which suffer from lack of water for irrigation purposes. The Agri.(FP) Deptt. who are generally concerned with the installation of tube wells were asked to say whether they have any scheme on hand to be worked in the S.Kanara Dt. That deptt. has since submitted a very detailed report in the matter - vide pp. 35-37 c.f. Particulars attention is invited to portion sidelined at 'M' on p. 37 c.f. which deals with S.Kanara Dt. in regard to sinking of tube wells. It is seen therefrom that the D.I. & C. has submitted proposals to the Agri.(FP) Deptt. for the sinking of tube wells and has suggested a list of 4 places said to have been selected in 1950 for putting down trial borings under the Intensive Cultivation scheme. The Agri.(FP) Deptt. have stated that they consider it unnecessary to spend Govt. money on such purely exploratory enterprise and have suggested that this deptt. may however consider the question of taking up these exploratory works in S.Kanara Dt. from out of the C.P.Funds if necessary. It may be pointed

out in this connection that if the work of sinking exploratory tube wells is to be undertaken ~~with~~ with the help of the C.P.Funds the amount has to come only fro the funds provided for 'Irrigation'. This is purely a loan provision. Loans can be granted to individual or any other Deptt. which can undertake to do the work. In view of the remarks of Agri.(FP) it is clear that, they will not come forward to execute the works taking a loan from this deptt. It appears therefore that the idea of sinking exploratory tube wells in the S.Kanara Dt. may have to be given up in the circumstances. For orders whether the P.E.O. may be informed on the above lines and he may be requested to appraise the member of the position. For orders.

N.V.S.
3.12.54.

'A'
N.V.S
3-12-54

N.J.
2-12-54 ~~MxMxS~~.

"There is no provision in C.P.Budget for sinking exploratory tube wells for irrigation but in file No.2998-54, the P.E.Os and B.D.Os of C.P.Dev.Blocks have asked for about 200 tube wells. On this basis, this Govt. have placed an order for 8 percussion type power drills. When these arrive, private parties have to ask for loans to sink these tube wells, as the provision under the schematic budget is only by way of 'Loan'. Action will be taken separately in that file even now, asking the P.E.Os and B.D.Os concerned to find the applicants who are willing to sink tube wells with the aid of these drills and get ready with applications from them for loans etd.

Even in South Kanara Project, the P.E.O. in that file has asked for four tube wells- 'A' ~~on page 7~~ above may be approved and the P.E.O. also requested to inform Sri Mukunda Prabhu that there is a proposal to sink

four wells. He will be in a position to tell the member where those four wells are proposed to be sunk and on what terms

N.V.S.
3-12-54"

" I am afraid there will be no progress in this direction if Govt. left the questi of tube wells for irrigation entirely to private parties. If there is adequate yield it might be possible to work a Govt.operated system of tube well irrigati But before this can be examined, there mus be adequate data before the Govt. which can only be obtained by an exploratory boring. If Govt. are not prepared to spend any money on such exploration, it would be unreasonable to expect private parties to do so.

I therefore suggest that the question be examined afresh. The cost of exploration can be made available from C.P.Funds as a loan to the State Govt.

After further examination, the case may be sent to this deptt. before it goes to Finance.

N.E.S.R.
6-12-54."

To A.S.

Please see orders of D.C.D. on pp. 8-9 above. There is another point for action in this file with reference to 'A' on p. 4 above. It does not therefore seem desirable to send this file U.O. to Agri.(FP) for further action with reference to orders of D.C.D. above. Extracts of notes and orders from p. 5 above may therefore be sent to Agri.(FP) for necessary

'urther action.

Agri(FP)

Notes of Pub (RDP).V from p 1 ante may be perused. With reg to A.A on p 3 ante, it may be noted

[redacted]

that in regard to the general question 1.12.54. of sinking tube wells in the State, at Govt. cost, for irrigation purposes, this dept have already considered that the tube wells scheme might be confined to the Dts of Ch T and TJR where alone each tube well is expected to irrigate an extent of about 40 acres, the irrigable extent in the other Dts ranging from 8 to 20 acres.

Having regard to the need for working tube wells economically, it is necessary to confine the tube wells scheme to areas having comparatively favourable underground water conditions. Otherwise, the water charges ~~that~~ will to be levied to work the tube wells without loss to the Govt. will become prohibitive and beyond the means of the ryots. In the circumstances, the question for consideration is whether it is necessary and desirable to put down trial borings (at Govt cost) to ascertain the possibilities of sinking tube wells in the S.K. Project area. From the notes of Pub (R.D.P) at pp 1-3 ante, it is seen that only a loan will be available for the purpose from C.P. funds and no subsidy. This dept. may in the circumstances reiterate its view that there is no case for the sinking of trial borings in the S.K. Project area at Govt. cost, ~~no case~~ treating it as a special case. Pub (R.D.P) may consult Fin. if the proposal is to be pursued.

With the above remarks, the case may be returned to Pub (R.D.P)
